

#00 Splash Screen

- Once authenticated,
users will see #1 directly.

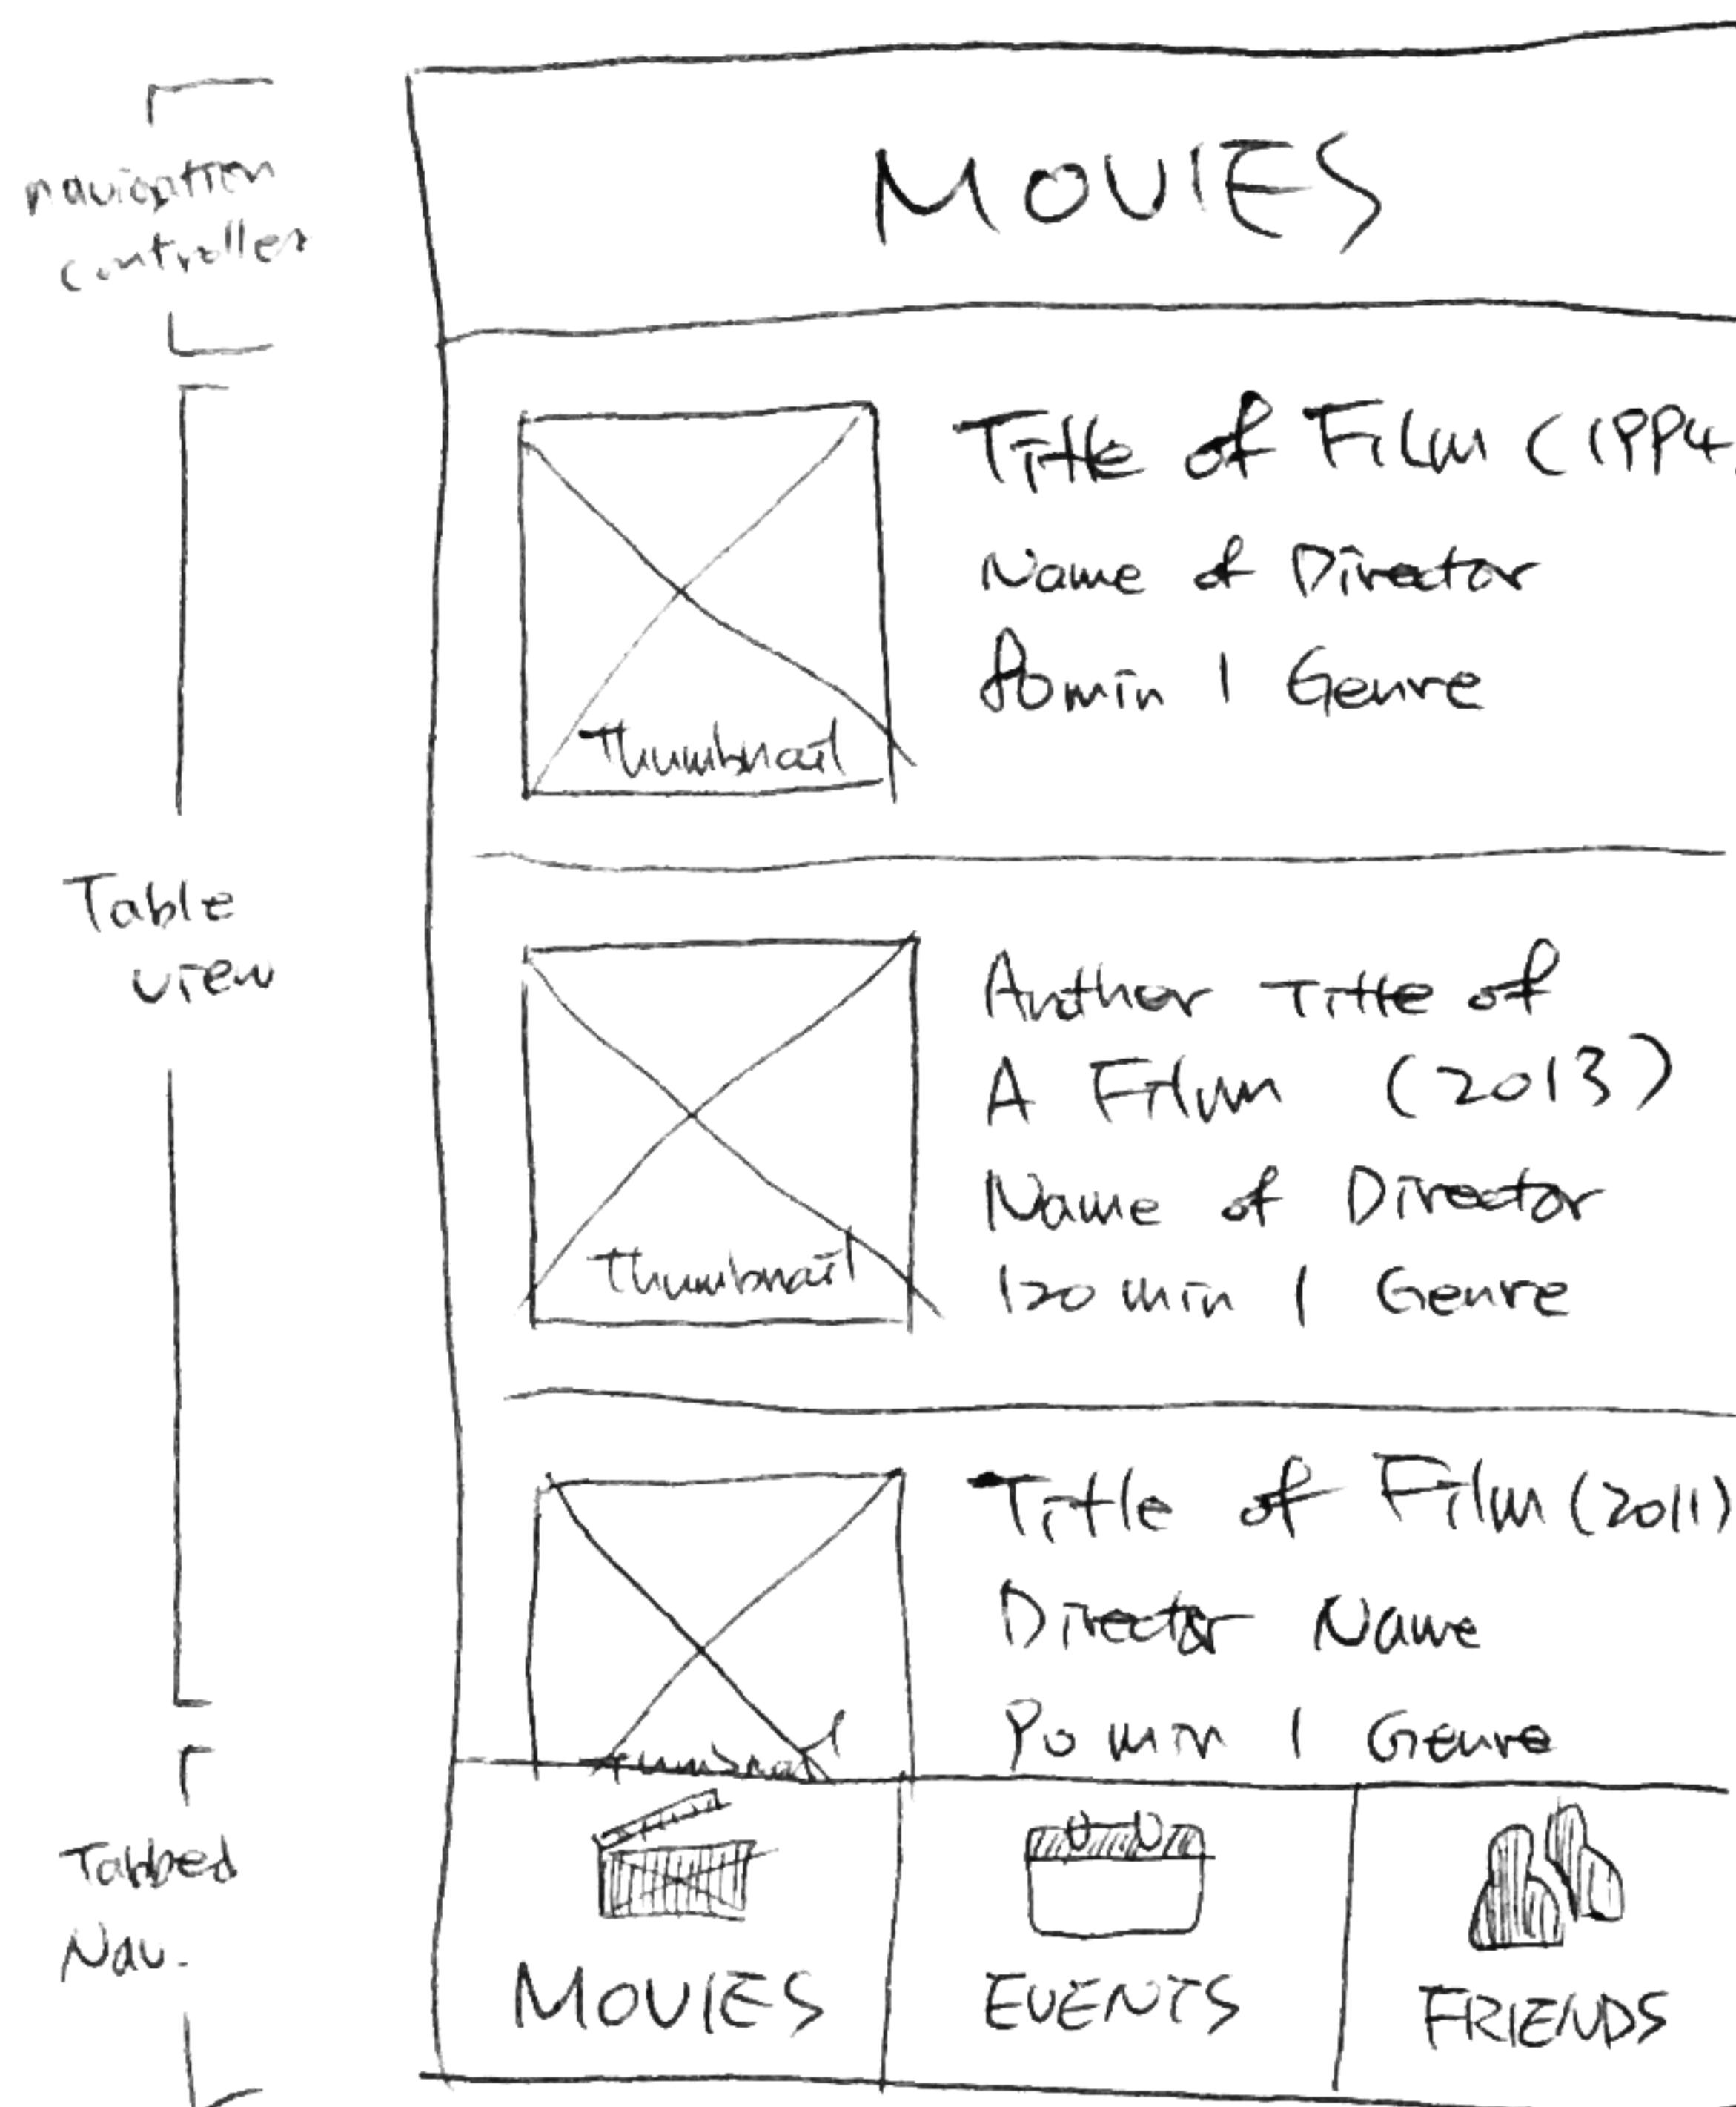

#0.1 First-time Authentication

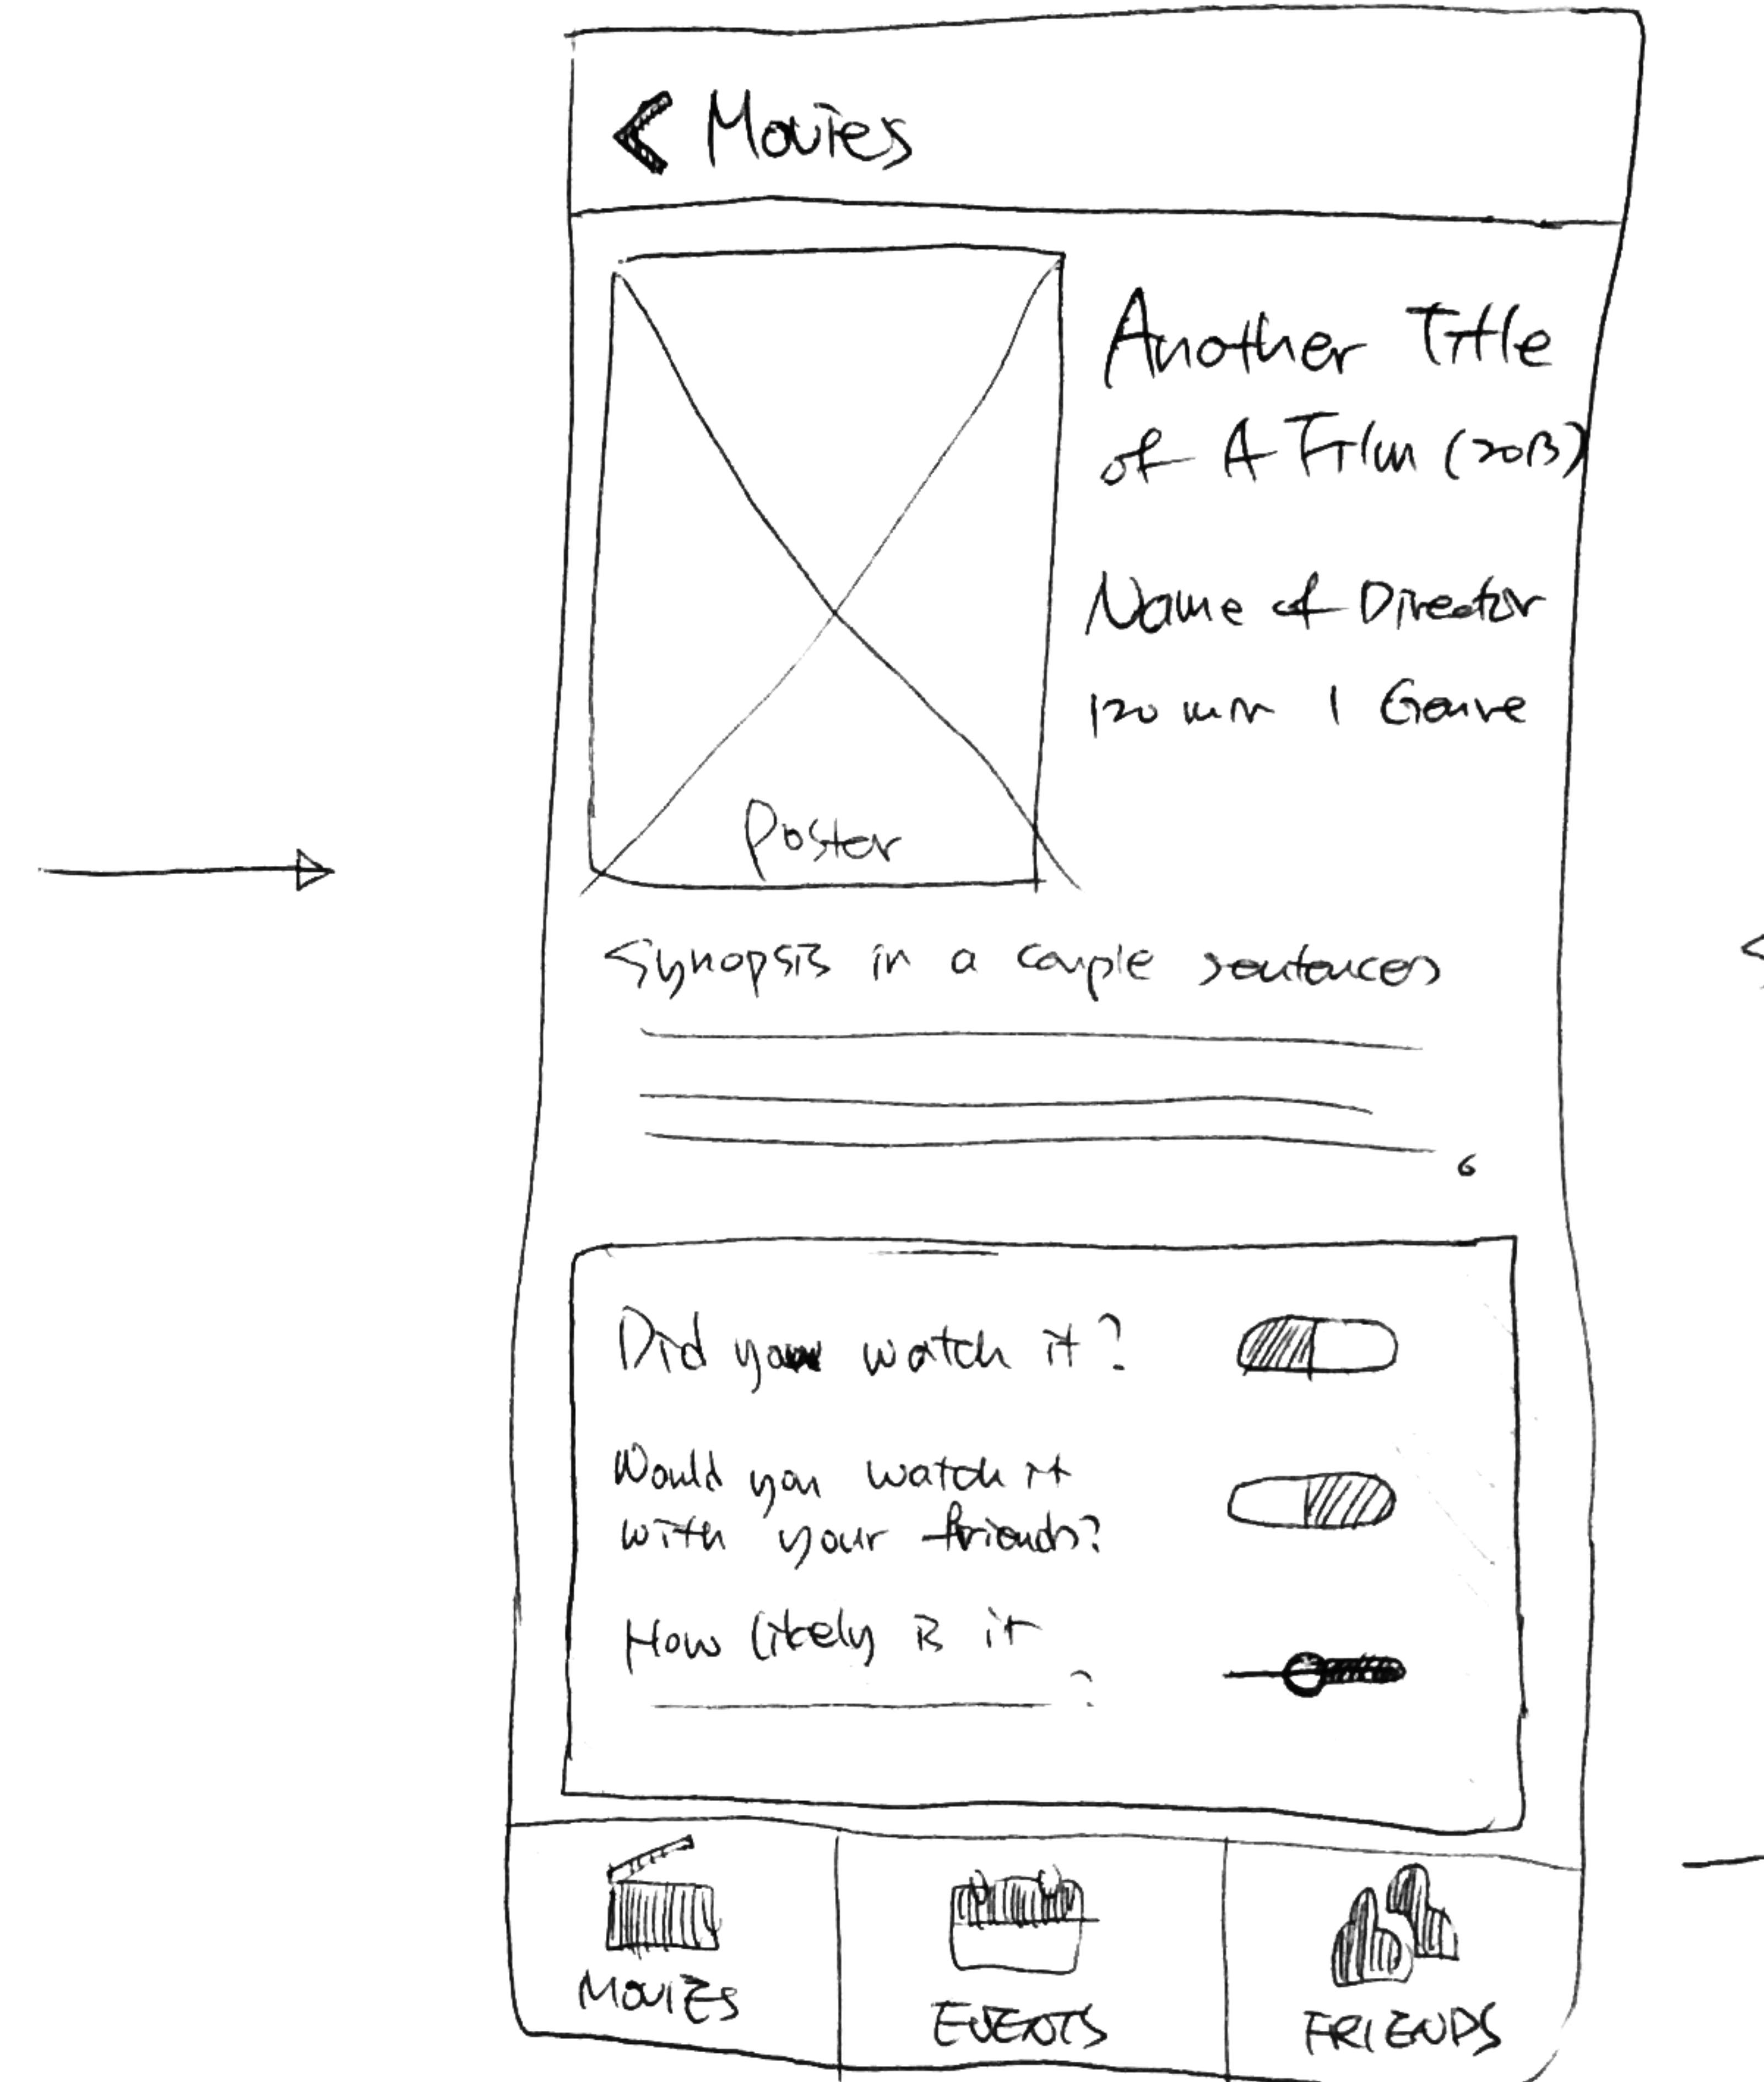

#0.2 First-time User Tutorial
(optional)

- Series of static screens
- Only if we have enough time to do

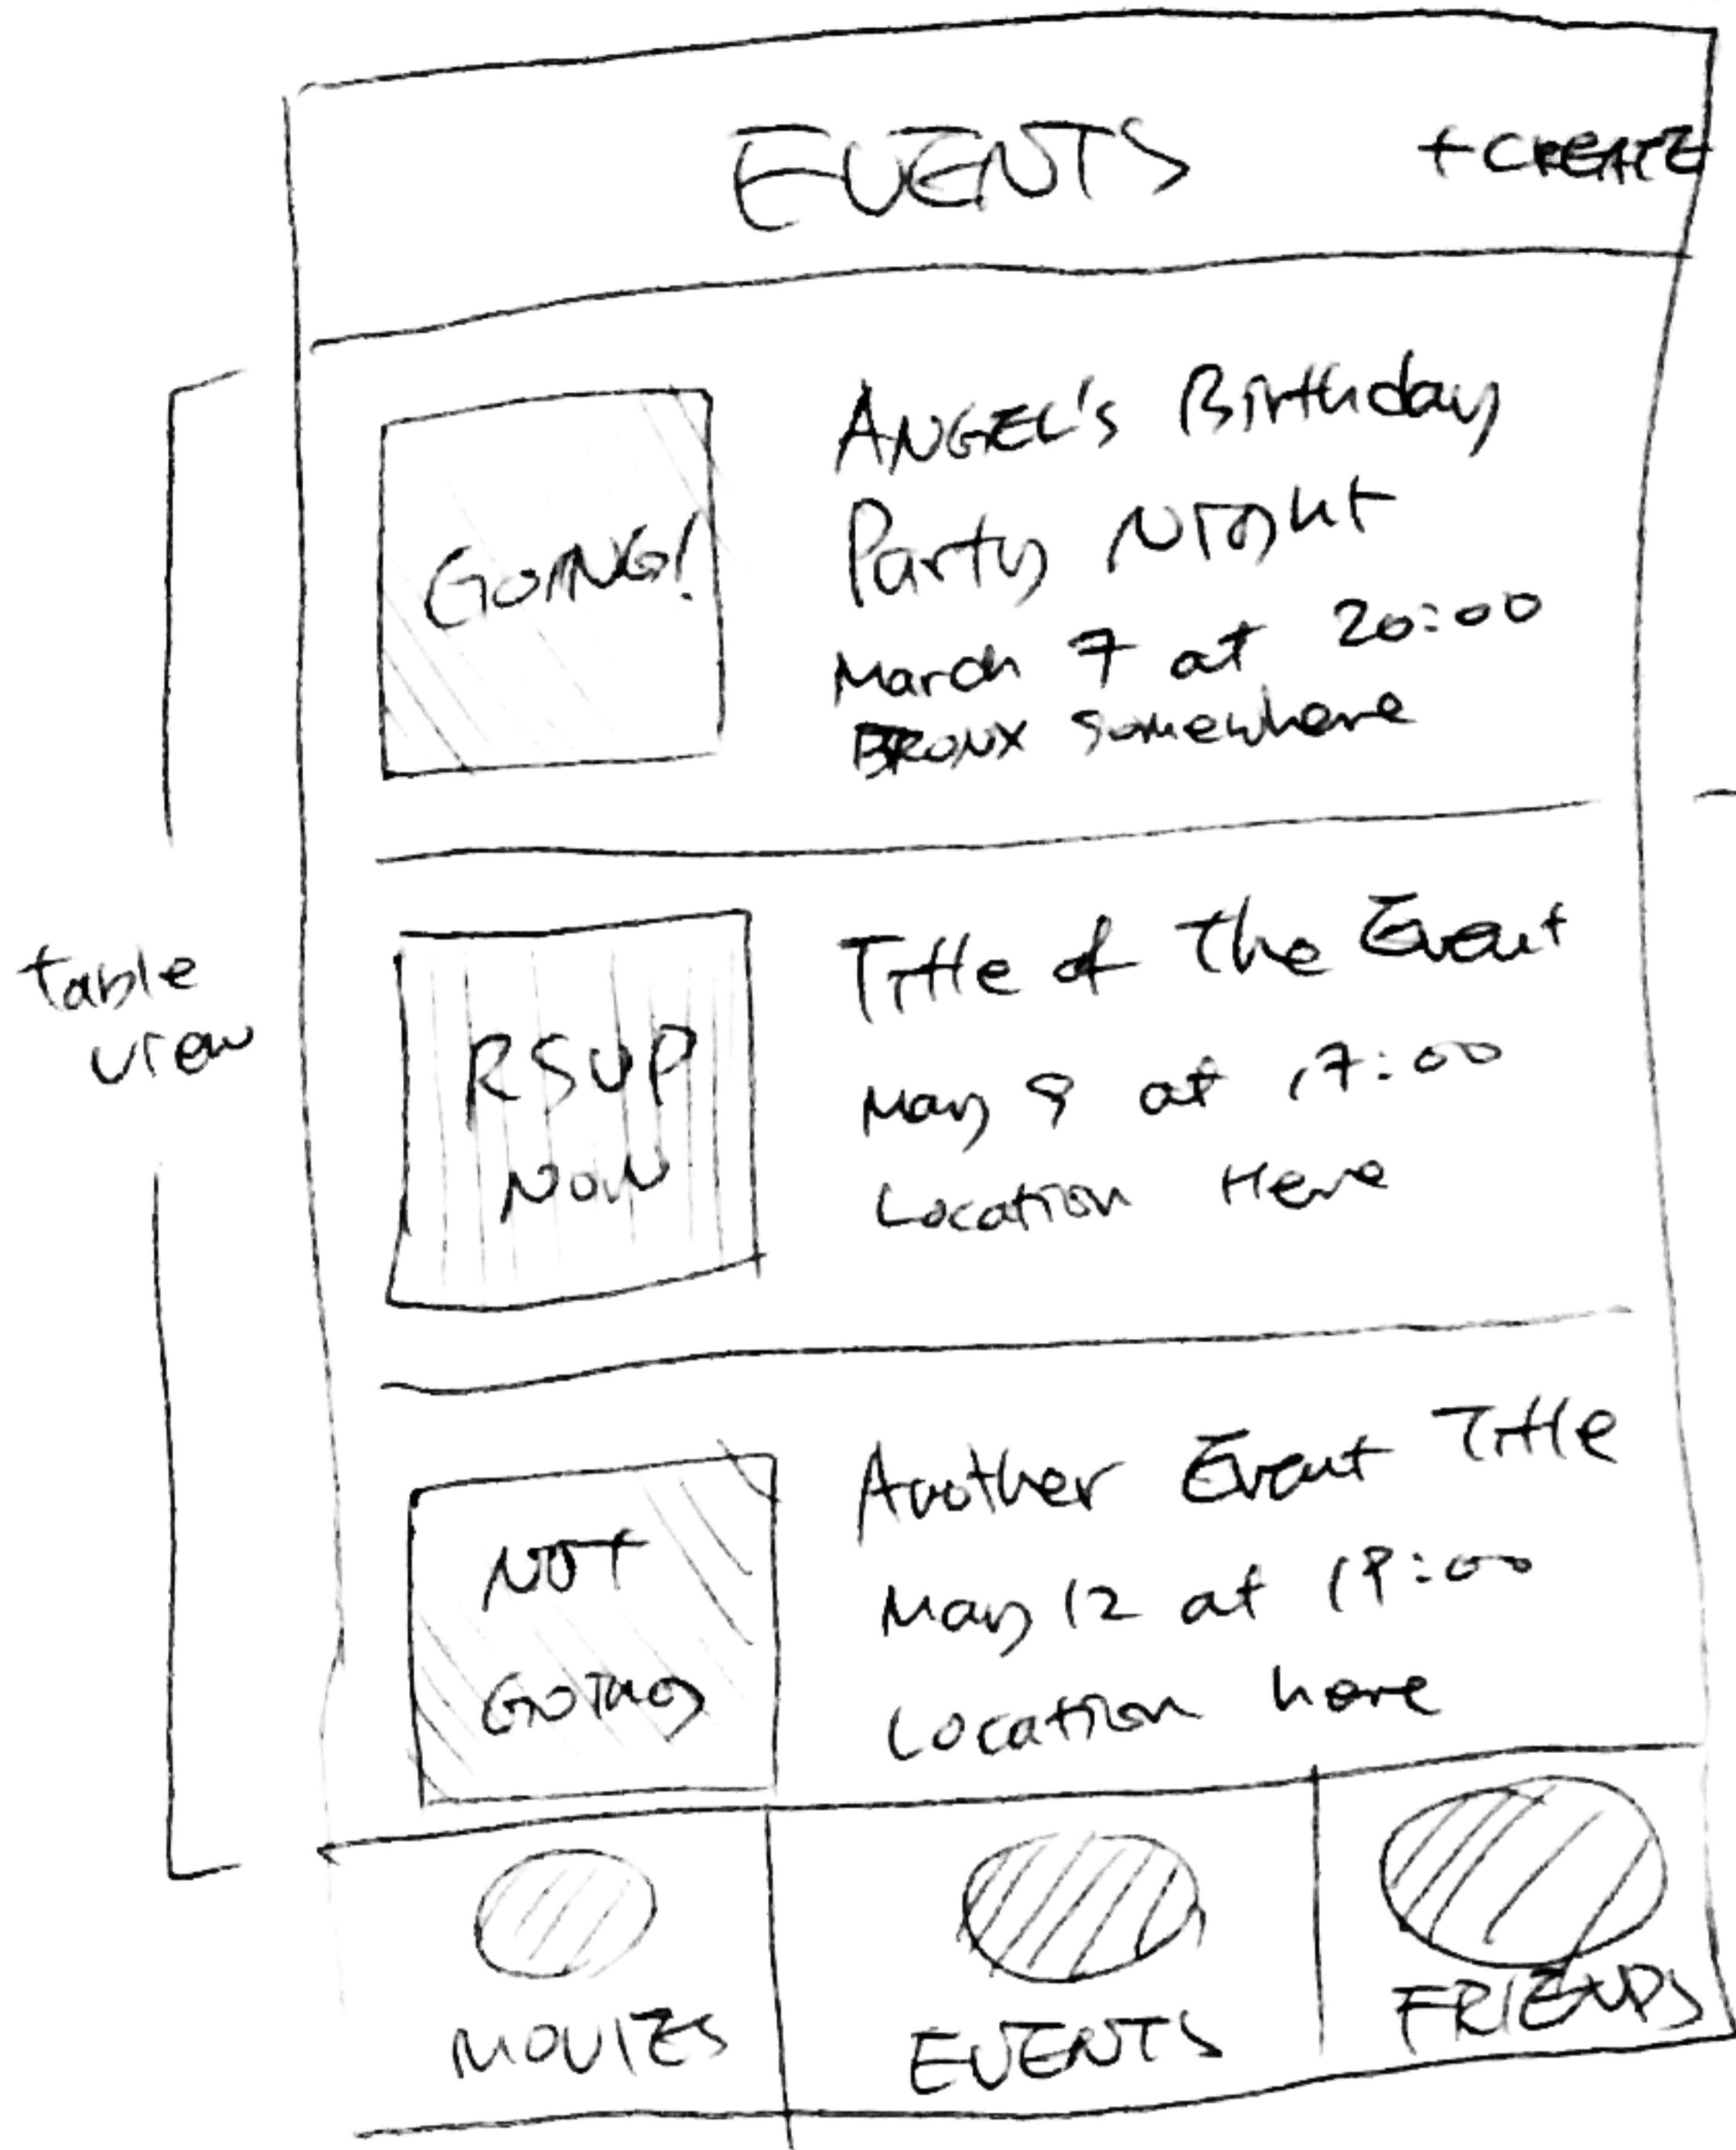

#1.0 Movie List & Home Screen

- This is the app Home screen
- Tabbed nav. on the bottom links to #1.0, #2.0, #3.0 respectively
- TableViewCell contains an ImageView and a few UILabels

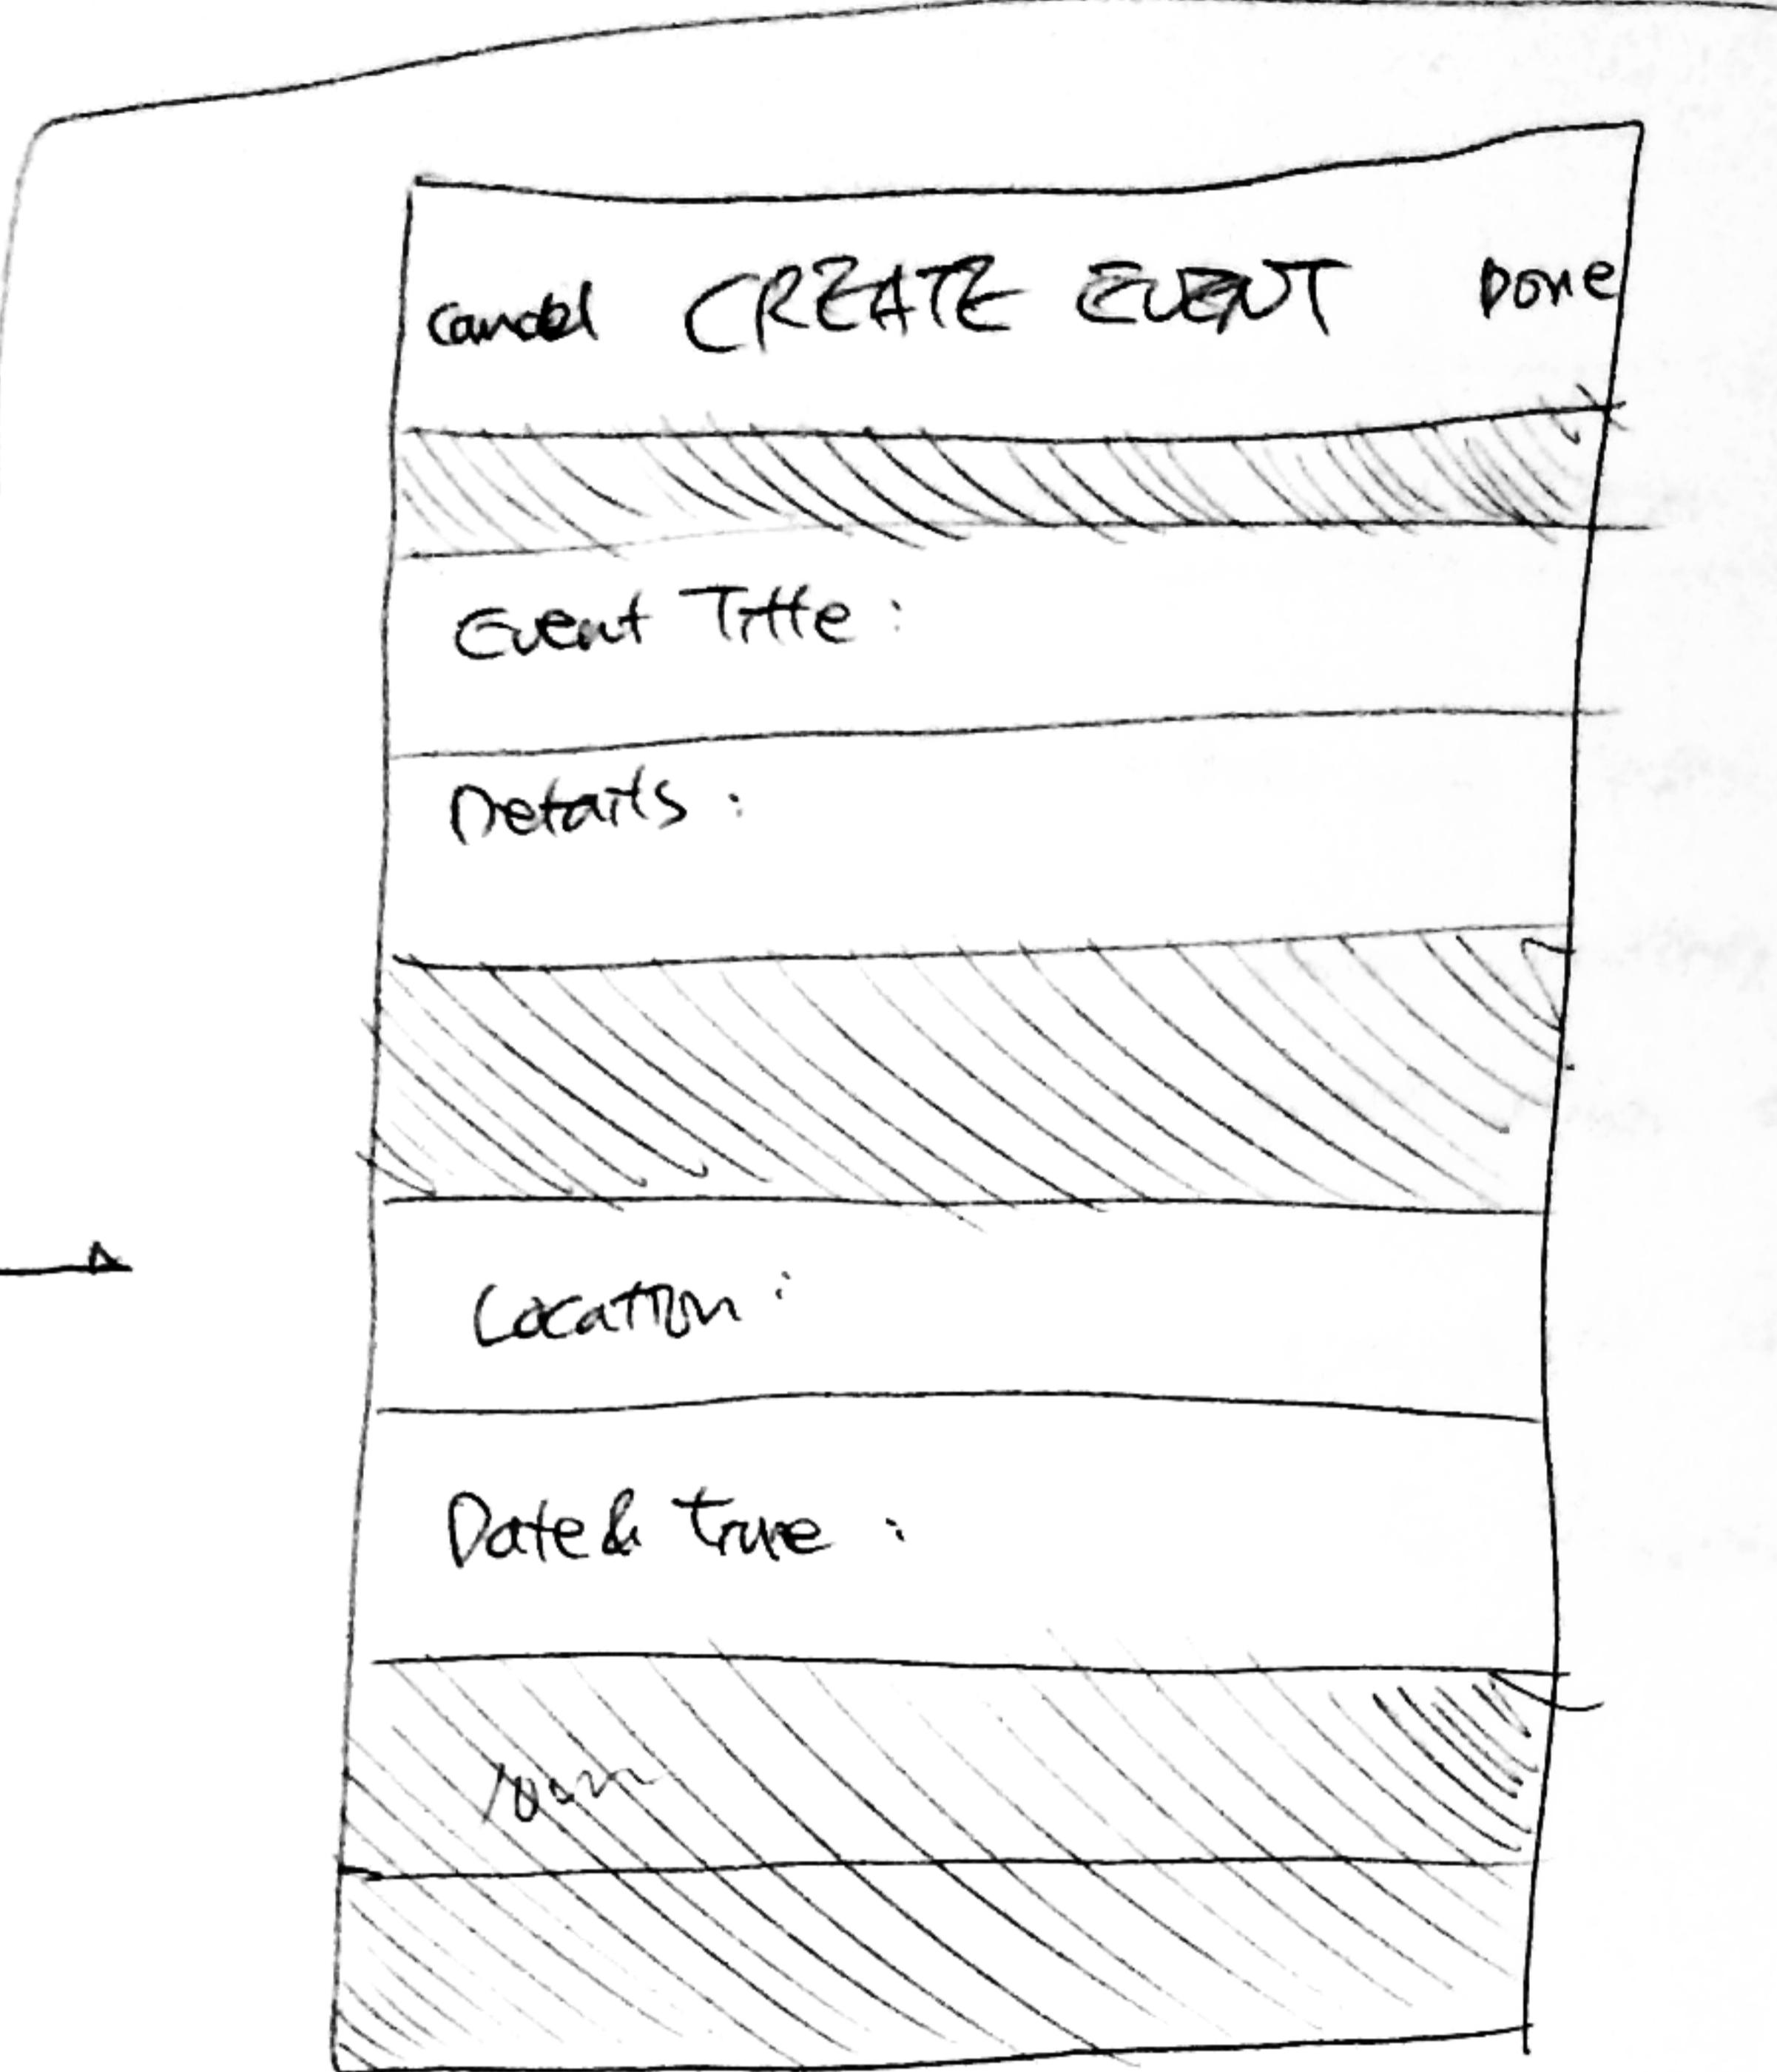

#1.1 Movie Details View

- Detailed summary of a film
- "Insight" questions
- Input data can be modified/updated later?
- Future Dev: related films, similar features

#2.0 Events List

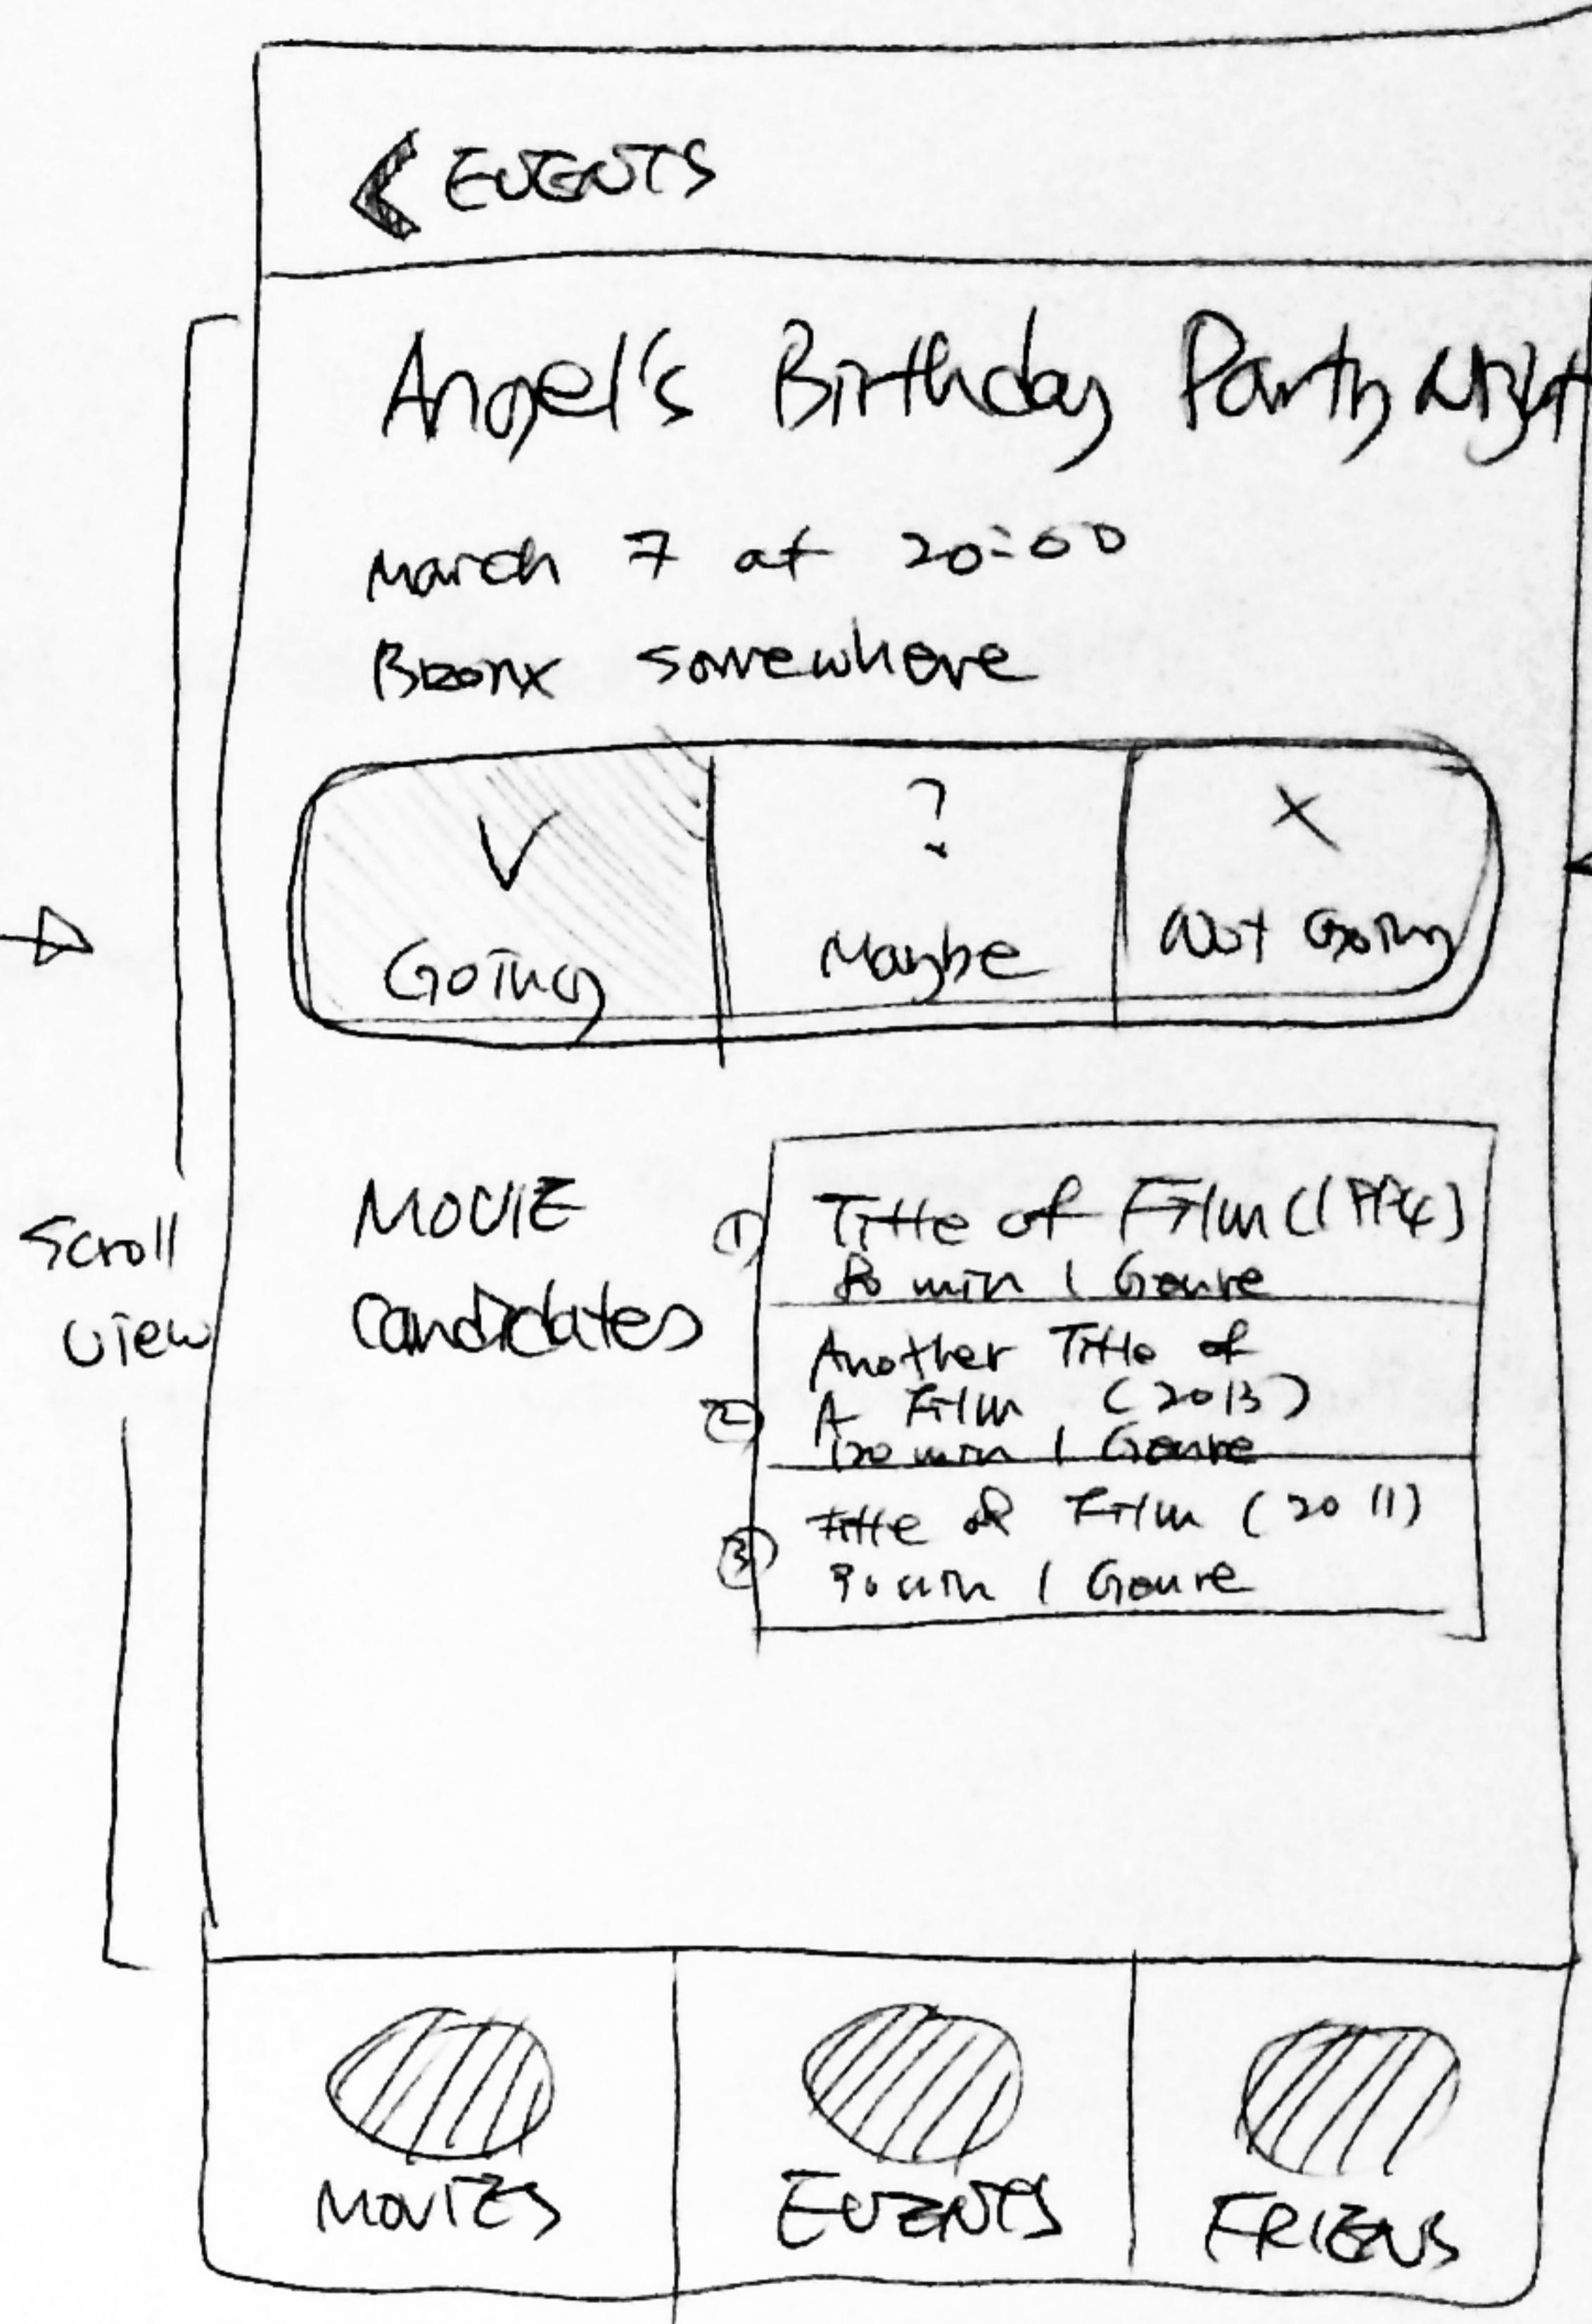

- Similar to #1.0, UITableView containing multiple subviews
- Displays events that a user has created or/and is invited to in chronological order

#2.1 CREATE EVENT

- Modal View
- Event Title and Location are simple UI Labels
- Details is a multiline Text Field
- Date & Time launches a time picker

② HOW/WHERE DO USERS INVITE PEOPLE TO EVENTS?

#2.2 Event Details View

- User can RSVP and update RSVP status
- Displays event title / date / location
- Displays Top Recommended movie list in TableView
- (optional) Tapping TableCell segue to respective movie detail screen #1.1

Things to consider

- ① Where and how do users invite friends to events?
 - when creating events
 - ~~when~~ after event is created

- ② UITableView with flexible number of cells in Friends List.
 - e.g. 5 friends or 2 friends. Can UITableView automatically adjust its height?

#3.0 FRIENDS LIST

- List of FB friends on this app.
- (Share) this app on user FB wall
(Promote)
